FRONT END DEVELOPER

Utilizing past art and design experience to create dynamic websites and applications that are visually appealing and functional. Developed and refined skills in HTML, CSS, JavaScript. A versatile self-starter with exceptional written and verbal communication able to work individually but also excel at team collaboration. Looking forward to blending creative and technical skills to create a web experience that is both effective and enjoyable.

SKILLS

HTML, CSS, JavaScript, jQuery, Bootstrap, Node.js, MySQL, MongoDB

PROJECTS

Day Planner

- Created with HTML5 and Bootstrap, jQuery and Moment JS
- Dynamically updates HTML and saves user input to local storage so schedule persists after page is refreshed
- Utilizes Moment JS and CSS3 to color code past, present, and future hours of the day for easy readability
- https://github.com/LJBarnes/day_planner

FurEver Home

- Lead developer in a group of 3
- Created with HTML, jQuery, Materialize CSS, The Dog API and The Cat API
- Search functionality based on user input
- <https://github.com/pdorgu00/FurEverHome>

Shelfie

- Created with MVC design pattern, Node.js, Express.js, Handlebars.js, Passport.js, MySQL, and Sequelize, Bulma, jQuery, Google Books API
- Oversaw layout and front end development
