FRONT END DEVELOPER

Utilizing past art and design experience to create dynamic websites and applications that are both visually appealing and functional. Developed and refined skills in HTML, CSS, JavaScript, jQuery, NodeJS and other current web technologies by completing a certificate in Full Stack Web Development from the University of North Carolina Charlotte. A versatile self-starter with exceptional written and verbal communication able to work individually but also excels at team collaboration. Looking forward to blending creative and technical skills to create a web experience that is both effective and enjoyable.

SKILLS AND PROJECTS

Technical Skills: HTML, CSS, Bootstrap, APIs, Media Queries, JSON, GIT, GitHub, jQuery, JavaScript, Node.js, the command line

Secure Password Generator

- Built with HTML, CSS, and JavaScript.
- Collects user input via prompts
- Generates strong user password based on user submitted criteria
- https://ljbarnes.github.io/password_generator/

Day Planner

- Created with HTML5 and Bootstrap
- Powered by jQuery and Moment JS
- Dynamically updates HTML and saves user input to local storage so schedule persists after page is refreshed.
- Utilizes Moment JS and CSS3 to color code past, present, and future hours of the day for easy readability.
- https://ljbarnes.github.io/day_planner/

FurEver Home

- Lead developer in a group of 3
- Powered by Materialize CSS, jQuery, The Dog API and The Cat API
- Search functionality based on user input
- HTML updated dynamically
- <https://pdorgu00.github.io/FurEverHome/>
