FRONT END DEVELOPER

Utilizing past art and design experience to create dynamic websites and applications. A versatile self-starter with exceptional creative and communication skills able to work individually but also excel at team collaboration. Looking forward to blending design and technical proficiency to create a web experience that is both effective and enjoyable.

SKILLS

HTML, CSS, JavaScript, jQuery, Bootstrap, Node.js, MySql, MongoDB, React.js, Adobe Photoshop, Adobe InDesign, Adobe Illustrator

---

PROJECTS

Day Planner
- Created with HTML5 and Bootstrap, jQuery and Moment JS
- Dynamically updates HTML and saves user input to local storage so schedule persists after page is refreshed
- Utilizes Moment JS and CSS3 to color code past, present, and future hours of the day for easy readability
- https://github.com/LJBarnes/day_planner | https://ljbarnes.github.io/day_planner

FurEver Home
- Lead developer in a group of 3
- Created with HTML, jQuery, Materialize CSS, The Dog API and The Cat API
- Search functionality based on user input
- https://github.com/pdorgu00/FurEverHome | https://pdorgu00.github.io/FurEverHome

Shelfie
- Created with MVC design pattern, Node.js, Express.js, Handlebars.js, Passport.js, MySql, and Sequelize, Bulma, jQuery, Google Books API
- Oversaw layout and front end development
- Features user account creation, login, logout, search functionality based on user input, database storage and retrieval
- https://github.com/taylormbruno/Shelfie | https://aqueous-refuge-48419.herokuapp.com
